HEALTH ON WHEELS

"A Mobile Clinic for Rural Areas"

01/01/2025

Health
on wheels

INTRODUCTION

Imagine living in a village where the nearest doctor is 60 kilometers away. Imagine that for every simple illness or emergency, people risk their lives to reach basic medical help .

This is the reality of thousands of people in rural Senegal. That’s why we created Health On Wheels — a mobile clinic project that brings healthcare directly to them.

PROJECT SUMMARY

Health On Wheels is a social enterprise that delivers essential healthcare services to underserved rural communities in Senegal through solar-powered mobile clinics integrated with telemedicine. By combining on-site primary care, vaccination campaigns, and remote specialist consultations, the project reduces distance, cost, and delays in accessing medical treatment.

Our scalable and sustainable model improves early diagnosis, strengthens preventive care, and expands healthcare coverage for vulnerable populations, particularly women, children, and low-income families.

HISTORY

2025 – Project Launch (Jan – Mar)

Health On Wheels was initiated in January 2025.
The team defined the problem, validated the concept, and developed the operational model integrating mobile healthcare and telemedicine.

2025 – Structuring & Partnerships (Apr – Jun)

Operational model finalized.
Budget defined (5M FCFA initial investment, 500k FCFA monthly operating cost). Engagement discussions with NGOs, medical professionals, and public institutions.

2025 – Concretization Phase (Jul – Present)

Preparation for pilot implementation.
Vehicle sourcing and medical equipment planning.
Telemedicine system design and partnership formalization in progress.

2026 – Finalization & Pilot Readiness

Final operational setup and resource mobilization.
Partnership confirmation and deployment readiness.
Impact measurement framework activation prior to pilot launch.

MACAS-SN

OUR SERVICE

A mobile medical clinic serving rural communities worldwide, providing essential care to those who need it most.

Basic first aid and treatments
Consultations, diagnostics and essential medications

Vaccination campaigns
Immunization against common and epidemic diseases

Health education and prevention
Awareness of good hygiene and health practices

Telemedicine Integration
Real-time remote consultations with urban doctors and specialists, reducing diagnostic delays.

PROJECT PLAN AND TIMELINE

(Month 1)

Operational Planning

Finalization of the operational model.
Budget validation and resource mapping.
Identification of target rural communities.

(Month 2-3)

Partnerships & Setup

Formalization of partnerships with medical professionals and NGOs.
Vehicle sourcing and medical equipment procurement.

(Month 4-7)

Pilot Preparation

Mobile clinic setup and branding.
Staff onboarding and technical training.
Community awareness and engagement campaign.

(Month 8)

Field Testing

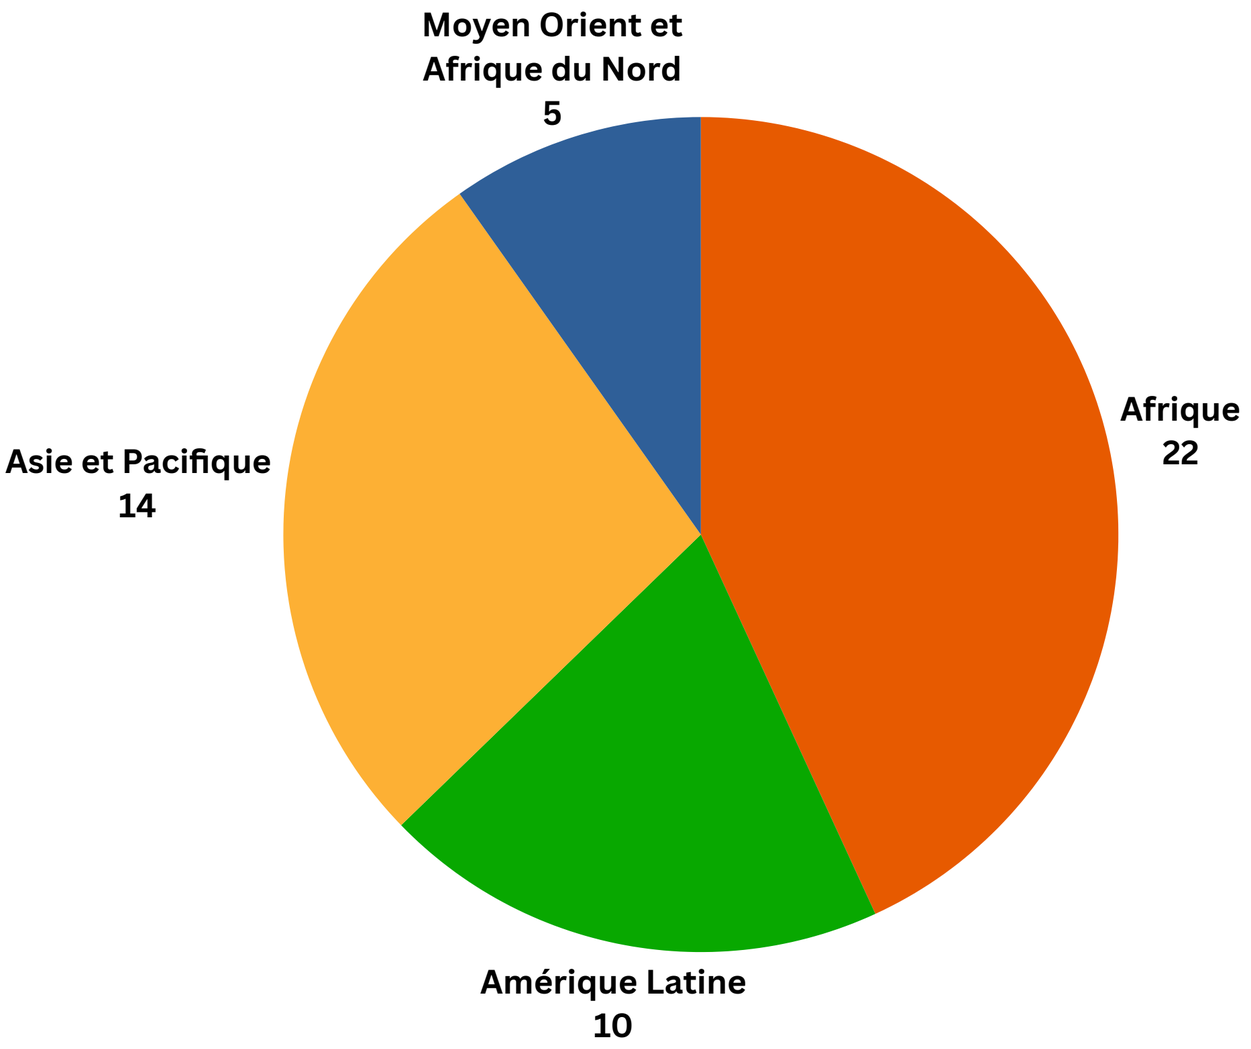
Initial field deployment simulation.
System testing (telemedicine & digital records).
Operational adjustments and risk mitigation.

(Month 9)

Pilot Launch

Initial field deployment simulation.
System testing (telemedicine & digital records).
Operational adjustments and risk mitigation

51 PAYS CIBLES



ESTIMATED PROJECT COST

Item	Amount (FCFA)
Recent Used Truck	40,000,000
Medical Storage Cabin Setup	4,000,000
Equipment Cabin Setup	2,000,000
2 kWh Solar Power System	3,800,000
400L Water Tank	1,000,000
20 m^2 Manual Tent	1,200,000
Accessories & Finishing	1,800,000
Medical Imaging + Clinic + Laboratory Equipment	25,000,000
Medicines & Consumables	5,200,000
Support Vehicle (Toyota Hilux 2017)	12,000,000
Total	**96,000,000 FCFA**

CONCLUSION

Health On Wheels is more than a project
it's a moving hope.

Healthcare should never be determined by distance, income, or geography. With Health On Wheels, we are building more than a mobile clinic—we are creating a scalable and sustainable system that restores dignity, access, and opportunity to underserved rural communities.

By combining innovation, telemedicine, and a viable business model, we aim to reduce preventable deaths, expand healthcare coverage, and advance health equity in alignment with the United Nations Sustainable Development Goals. This is not just a project; it is a commitment to bringing healthcare closer to those who need it most, and we are ready to make it a reality.
